ABSTRACT

This document contains classification schedules and a thesaurus of terms for describing federal data collection activities for education. The terms in the classification schedules are grouped and classified hierarchically into 12 major categories: people; students; employees; organizations; education organization functions; public administration functions; federal education assistance programs; organization finances; physical resources; outcomes of education; time periods; and educational subject matter. The schedules serve four functions: (1) they provide a conceptual framework for describing and classifying education terminology and education data collection; (2) they provide terms used to describe survey instruments; (3) they provide the language used to formulate queries for retrieving information from the Redundancy Checking System database; and (4) they provide the classification structure for the glossary. A guide to the correct and consistent usage of classification schedule terms, the thesaurus will be used primarily by those indexing survey instruments for the Redundancy Checking database and those formulating queries at the retrieval stage of the Redundancy Checking System. The thesaurus lists both controlled vocabulary terms and lead-in terms--words and phrases that might occur in survey instruments. All terms are listed alphabetically. An overview, description, and recommendations for use and update are provided for both the classification schedules and the thesaurus. (THC)

Classification Schedules: Overview

The Classification Schedules consist of terms to describe federal data collection activities for education. The terms are grouped and classified hierarchically into 12 major categories:

01	People
02	Students
03	Employees
04	Organizations
05	Education Organization Functions
06	Public Administration Functions
07	Federal Education Assistance Programs
08	Organization Finances
09	Physical Resources
10	Outcomes of Education
11	Time Periods
12	Educational Subject Matter

The Classification Schedules are sometimes referred to as an *index language* (a reference to their use in indexing survey instruments) or as a *controlled vocabulary* (referring to the fact that these terms, with their controlled spelling and syntax, are the ones used in the Redundancy Checking System). The terms themselves may be referred to as Classification Schedules terms, index terms, or controlled vocabulary terms.

The Classification Schedules serve four functions within the Thesaurus/Glossary System and Redundancy Checking System:

- They provide a conceptual framework for describing and classifying education terminology and education data collection.
- They provide the terms used to describe survey instruments used in federal data collection activities for education.
- They provide the language used to formulate queries for retrieving information from the Redundancy Checking System data base.

- They provide the classification structure for the Glossary.

Classification Schedules: Description

Each term in the Classification Schedules is assigned a code number to identify its place in the hierarchy. Each two digits of the code represent a level of hierarchy; codes with the same number of digits are at the same level. The fewer the digits, the higher the code is in the hierarchy.

The Classification Schedules reflect the idea of three major elements in education: the participants, the process, and the physical setting.

Participants

-- PEOPLE (01), especially

-- those doing the learning, STUDENTS (02)

-- those providing learning activities, EMPLOYEES (03) and ORGANIZATIONS (04).

Process

-- Three kinds of processes: EDUCATION ORGANIZATION FUNCTIONS (05), PUBLIC ADMINISTRATION FUNCTIONS (06), and FEDERAL EDUCATION ASSISTANCE PROGRAMS (07);

-- all three involve ORGANIZATION FINANCES (08);

-- all involve OUTCOMES OF EDUCATION (10);

-- all take place over TIME PERIODS (11);

-- all deal ultimately with the interchange of EDUCATIONAL SUBJECT MATTER (12).

Setting

-- Sites, buildings, equipment, materials, and supplies are the PHYSICAL RESOURCES (09) involved.

On the pages that follow, each of the Classification Schedules terms is briefly described. The purpose here is not to define the terms but to describe their intended use within the Redundancy Checking System.

PEOPLE 01

Terms in this schedule describe characteristics shared by all human beings. (See also STUDENTS, EMPLOYEES.)

PERSONAL PHYSICAL CHARACTERISTICS 01.01

Physical characteristics of human beings.

AGES 01.0101

Ages of human beings.

Either full-time or part-time; also used for "full-time equivalency."

TENURE STATUS 03.0503

Employees' status with respect to permanence of appointed position.

EMPLOYEE WORKLOAD 03.0504

Amount of work assigned to an employee.

SALARY STATUS 03.0505

Arrangement for compensation (if any) between employees and the organization or person employing them.

PAID EMPLOYEES 03.0505.01

Employees who receive compensation. (See also COMPENSATION RECEIVED.)

VOLUNTEERS 03.0505.02

Employees who do not receive compensation.

EMPLOYEE PERFORMANCE 03.06

Conduct and achievements of employees in relation to the organization or person employing them.

EMPLOYEE TERMINATION 03.07

Employees' departure from the organization or person employing them.

ORGANIZATIONS 04

Includes both formal and informal organizations.

ORGANIZATIONS BY PURPOSE* 04.01

Organizations categorized by primary purpose.

EDUCATION ORGANIZATIONS 04.0101

Organizations whose primary purpose is the direct delivery of instruction services.

---

*Subcategories of ORGANIZATIONS BY PURPOSE are patterned loosely after those in the Standard Industrial Classification Manual prepared by the Statistical Policy Division of the Office of Management and Budget and published in 1972 by the U.S. Government Printing Office in Washington, D.C.

EDUCATION ORGANIZATION SYSTEMS 04.0101.01

Groups of education organizations joined together for a common purpose.

LOCAL EDUCATION AGENCIES 04.0101.0101

Educational agencies at the local level, usually at the elementary/secondary level.

POSTSECONDARY EDUCATION SYSTEMS 04.0101.0102

Postsecondary education institutions joined together for a common purpose, often under a common administration.

SCHOOLS 04.0101.02

Individual education organizations.

LEVEL-SPECIFIC SCHOOLS 04.0101.0201

Organizations offering instruction programs categorized by grade level.

ELEMENTARY AND SECONDARY SCHOOLS 04.0101.0201.01

Organizations offering elementary and/or secondary programs.

POSTSECONDARY INSTITUTIONS 04.0101.0201.02

Organizations offering programs above the secondary level.

NONCOLLEGIATE POSTSECONDARY INSTITUTIONS 04.0101.0201.0201

Organizations offering programs above the secondary level, leading either to no award or to one below an associate degree.

HIGHER EDUCATION INSTITUTIONS 04.0101.0201.0202

Organizations offering programs leading to at least an associate degree.

TWO YEAR INSTITUTIONS 04.0101.0201.0202.01

Postsecondary education organizations offring two-year programs.

COLLEGES AND UNIVERSITIES 04.0101.0201.0202.02

Postsecondary education organizations offering programs more than two years in length, normally leading to a baccalaureate or higher degree.

METHOD-SPECIFIC SCHOOLS 04.0101.0202

Organizations offering instruction programs categorized by the techniques, materials, locations, or instructors involved.

CORRESPONDENCE SCHOOLS 04.0101.0202.01

Organizations offering instruction through the exchange of materials sent by mail.

PURPOSE-SPECIFIC SCHOOLS 04.0101.0203

Organizations offering instruction programs categorized by primary purpose.

OCCUPATIONAL SCHOOLS 04.0101.0203.01

Organizations offering programs whose primary purpose is imparting occupational skills.

CONTENT-SPECIFIC SCHOOLS 04.0101.0204

Organizations offering instruction programs categorized by subject matter or other content.

LEARNER-SPECIFIC SCHOOLS 04.0101.0205

Organizations offering instruction programs categorized by the type of learner for which they are designed.

SPECIAL EDUCATION SCHOOLS 04.0101.0205.01

Organizations offering special education programs for the handicapped.

LIBRARIES 04.0101.03

Organizations which maintain and facilitate access to collections of printed materials, other graphic materials, and/or nonprint media, and which provide learning activities primarily through delivery of information services.

LIBRARIES BY ORGANIZATION SERVED 04.0101.0301

Libraries categorized by the type of organization for which services are provided, for example, "school libraries," "academic libraries."

LIBRARIES BY COLLECTION SUBJECT MATTER 04.0101.0302

Libraries categorized by subject matter of collection; for example, "law libraries."

LIBRARIES BY CONTROL 04.0101.0303

Libraries categorized by the level or type of organization controlling them; for example, "public libraries," "state libraries." (See also ORGANIZATIONS BY CONTROL.)

MUSEUMS* 04.0101.04

Organizations which preserve, research, exhibit, and demonstrate collections of objects, concepts, and techniques of artistic, historical, or scientific value.

NONEDUCATION ORGANIZATIONS 04.0102

Organizations whose primary purpose is not the direct delivery of instruction services (although their primary purpose may be the support of instruction services).

PUBLIC ADMINISTRATION ORGANIZATIONS 04.0102.01

Organizations whose primary purpose is public administration. (See also PUBLIC ADMINISTRATION FUNCTIONS.)

GOVERNMENT AGENCIES 04.0102.0101

Includes all commissions, boards, councils, administrations, departments, and authorities of any government.

---

*Definition is from *Adult Learning Activities: A Handbook of Terminology for Classifying and Describing the Learning Activities of Adults* (Draft 6), prepared by the National Center for Higher Education Management Systems for the National Center for Education Statistics; June 1978.

FEDERAL GOVERNMENT AGENCIES 04.0102.0101.01

All commissions, boards, councils, administrations, departments, and authorities of the federal government.

FEDERAL EDUCATION AGENCIES 04.0102.0101.0101

Federal government agencies whose primary purpose is the administration of education programs.

Classification Schedules: Recommendations for Use

The terms in the Classification Schedules are intended to be used in describing the content of the survey instruments used in federal data collection activities for education. They are not intended to be used in describing the purpose or type of survey instruments,* thus they cannot be used to describe a survey instrument as a "financial status report," a "performance report," or an "application." However, they can be used to specify the topics such survey instruments cover; for example, "program finances," "program effectiveness," or "new budgets."

Detailed instructions for using the terms in the Classification Schedules may be found in three sources:

- Part III of this document, the Thesaurus;
- Redundancy Checking System: Retrieval Manual;
- Redundancy Checking System: Indexing Manual.

---

*Purpose, type, and other survey instrument descriptors are included in the Instrument Characteristics File, described in Redundancy Checking System: Retrieval Manual.

Classification Schedules: Recommendations for Update

As education laws and policies change, federal data collection activities for education will deal with new topics. This section explains how to revise the Classification Schedules to keep them effective in describing survey instruments.

Three computer files are closely linked to the Classification Schedules: the Thesaurus file, the Glossary source term file, and the Redundancy Checking System's Descriptor Master File. Each time the Classification Schedules are changed, the revisions must be reflected in all three files. For the Thesaurus and Glossary source term files, some of the necessary changes are made automatically by the computer system; no changes are made automatically in the Descriptor Master File. Therefore it is recommended that revisions in the Classification Schedules be made only after careful study of their effect on both the Thesaurus/Glossary and Redundancy Checking Systems.

To monitor the need for revision it is recommended that users of the Redundancy Checking System keep the following lists of suggested changes;

1. Terms that are seldom or never used and therefore ought to be deleted.
2. Terms that would be clearer or easier to use if their spelling and/or wording were changed (but not their meaning).
3. Suggested changes in classification and structure of the terms;
4. Suggested new terms; the Redundancy Checking System's "natural language" feature provides an automated mechanism for keeping

such lists (see Redundancy Checking System: Retrieval Manual and Redundancy Checking System: Indexing Manual.

At regular intervals, these lists should be reviewed and, if necessary, Classification Schedules updates prepared. In preparing new or revised terms for the Classification Schedules, the following guidelines should be observed:

1. Keep terms as short as possible.
2. Avoid terms that are vague, subject to misinterpretation, or have several common meanings. (For example, the word facilities should be avoided, since it can mean equipment, rooms, buildings, sites, or any of several combinations of these.)
3. Minimize punctuation. Only hyphens, slashes, and parentheses are permitted.
4. Use nouns or noun phrases. (For example, STUDENT DISCIPLINE is preferable to DISCIPLINING STUDENTS.)
5. Use plural forms whenever possible.
6. Avoid prepositions and conjunctions. (For example, HIGHER EDUCATION INSTITUTIONS is preferable to INSTITUTIONS OF HIGHER EDUCATION; STUDENT FULL-TIME STATUS is preferable to FULL- OR PART-TIME STUDENTS.)

In determining the appropriate classification code for new or revised terms, the following guidelines should be observed:

1. Codes should follow the format described on page 3.
2. Assign codes with an even number of digits.

3. Do not end a code with two zeros.
4. Use the Thesaurus and the Glossary Structure Display as guides in determining the appropriate classification of new terms.

When adding a new term or changing the spelling of an existing term, check the Thesaurus first to determine if the new term already exists as a lead-in entry. If it does, delete the lead-in entry. (See section IIB of the Thesaurus/Glossary System: User's Guide for instructions.)

After the updates have been prepared and entered according to the instructions in section IIA of the Thesaurus/Glossary System: User's Guide, the user should check the three change reports produced by the computer system. The Classification Schedules Change Report should be checked to verify that all updates were entered correctly. The Thesaurus Change Report has three sections; the "added" and "changed" sections may be reviewed to verify that the desired changes were made. The "deleted" section should be carefully checked for entries that should be reentered to reflect the changes in the Classification Schedules.

At this time, the Thesaurus should be reviewed for other changes that may be necessary. If new terms have been added to the Classification Schedules, it may be desirable to add new lead-ins and other Thesaurus references to clarify the intended usage of the new terms. If the new terms are more specific than the old ones, the existing lead-in entries may need to be changed to reflect this. (For example, if SOCIAL STATUS were added to the Classification Schedules, then the Thesaurus entry FAME: USE SOCIOECONOMIC CHARACTERISTICS would need to be changed to FAME: USE SOCIAL STATUS.) For detailed information on Thesaurus updates, see Thesaurus: Recommendations for Update on page 89 of this document and section IIB of Thesaurus/Glossary System: User's Guide.

After updating is complete, print and distribute new copies of the Classification Schedules, Thesaurus, and Index to the Thesaurus.

The terms in the Glossary source term file are classified within the structure of the Classification Schedules. If Classification Schedules terms are deleted, or if their codes are changed, then all the source terms that had been classified under them will be "unclassified" (that is, their structure codes will be changed to 99.9999.9999.9999.999999.9999.999999), and the Glossary Change Report will show a list of "Source Terms Unclassified during this Run." This report will list each source term and its term identification number. This report may be used as a guide to reassigning structure codes so that the source term file (and Glossary report) will reflect the updated Classification Schedules. At this time, as in the Thesaurus, other source terms may also need to be reclassified if the updated Classification Schedules include terms more specific than the old version. For detailed instructions on updating the Glossary source term file, see Recommendations for Update in the Introduction to the Glossary of Education Terminology and section IID of the Thesaurus/Glossary System: User's Guide.

Thesaurus: Overview

The Thesaurus is a guide to the correct and consistent usage of Classification Schedules terms; it will be used primarily by (a) those indexing survey instruments for the Redundancy Checking System data base and (b) those formulating queries at the retrieval stage of the Redundancy Checking System. The Thesaurus lists both controlled vocabulary terms (from the Classification Schedules) and lead-in terms--words and phrases that might occur on survey instruments. All terms are listed alphabetically; most include references showing correct usage of controlled vocabulary terms.

Thesaurus: Description

Each Thesaurus entry begins with either a controlled vocabulary term (from the Classification Schedules) or a lead-in entry (a phrase that might occur on a survey instrument and that leads the user to controlled vocabulary terms). This is followed by references: for a controlled vocabulary term, listing concepts for which it is used and relationships to other controlled vocabulary terms; for a lead-in entry, list the controlled vocabulary term(s) used to express it.

Controlled vocabulary terms and lead-in entries are listed together in alphabetical order. Alphabetization is word-by-word; blanks, hyphens, and other special characters are significant. The sequence used in alphabetization (EBCDIC) is:

1 blank spaces;
2 special characters (hyphen, slash, and parentheses);
3 letters;
4 numbers.

Three types of references are used with lead-in terms: USE, USE AND, and SEE. Five types of references are used with controlled vocabulary terms: SN (scope note), UF (used for), RT (related term), BT (broader term), and NT (narrower term). The references are described below.

USE reference:

ACADEMIC CALENDAR SYSTEMS
USE ACADEMIC YEARS

The USE reference shows the particular controlled vocabulary term which should always be used to express the idea given in the lead-in. The example above shows that if indexers or retrievers wish to express the idea of "academic calendar systems" they should use the controlled vocabulary term ACADEMIC YEARS.

USE AND reference:

MATHEMATICS CLASSES
USE CONTENT-SPECIFIC INSTRUCTION
AND MATHEMATICS SUBJECT MATTER

The USE AND reference indicates that although no one controlled vocabulary term is adequate to express the concept of the lead-in, there is a particular combination of two or more controlled vocabulary terms which should be used. In the example above, the concept "mathematics classes" is expressed by the two terms CONTENT-SPECIFIC INSTRUCTION and MATHEMATICS SUBJECT MATTER.

SEE reference:

HEALTH SERVICES
SEE PUBLIC HEALTH CARE SERVICES
STAFF SERVICES
STUDENT HEALTH SERVICES

The SEE reference indicates that the lead-in can have more than one interpretation; controlled vocabulary terms are listed which might be used (separately or in combinations) to express the possible interpretations. When confronted with a SEE reference, indexers and retrievers must reexamine their surveys or queries, then select those controlled vocabulary terms which most nearly express the desired concept. In the example above it can be seen that there are three index terms dealing with "health services":

PUBLIC HEALTH CARE SERVICES, provided to the general public; STAFF SERVICES, which include health services provided to staff members; and STUDENT HEALTH SERVICES. A Redundancy Checking System user might wish to use one, two, or all three of these terms, depending on the meaning desired.

SN reference: MEMBERSHIP ORGANIZATIONS 04.0102.04
SN: ORGANIZATIONS OPERATING ON A MEMBERSHIP BASIS FOR THE PROMOTION OF THE INTERESTS OF THE MEMBERS.

The SN (scope note) reference explains the meaning or intended usage of a controlled vocabulary term. The scope note in the example above defines the term MEMBERSHIP ORGANIZATIONS.

UF reference: OCCUPATIONAL CREDENTIALS 10.0301.0202.01
UF LICENSES
PROFESSIONAL CERTIFICATES
TRADES LICENSES

The UF (used for) reference lists concepts for which the controlled vocabulary term should be used; it is the reciprocal of the USE reference described above. The terms listed in a UF reference may include some which have meanings similar to the controlled vocabulary term, some which are narrower in scope, and some which are only slightly related. In the example above, "licenses" has a meaning similar to that of the controlled vocabulary term OCCUPATIONAL CREDENTIALS; "professional certificates" and "trade licenses" are each narrower in scope.

RT reference: EMPLOYERS 01.0307
RT EMPLOYEES BY EMPLOYER
ORGANIZATIONS

The RT (related term) reference lists controlled vocabulary terms which are related to one another. In the example above the main entry is EMPLOYERS; the RT entries note that it is related to the terms EMPLOYEES BY EMPLOYER and ORGANIZATIONS.

BT reference: GOVERNMENT BENEFITS RECEIVED 01.0303.0404
BT PERSONAL INCOME

The BT (broader term) reference notes controlled vocabulary terms which are broader in meaning than the main entry; it is used when necessary to clarify the meaning and usage of the main entry. The example above notes that PERSONAL INCOME is a broader term than GOVERNMENT BENEFITS RECEIVED, which therefore is to be used to mean only benefits received by individuals (as opposed to organizations).

NT reference: FINANCIAL TRANSACTIONS 08.03
NT DISBURSEMENTS
INTERFUND TRANSFERS
RECEIPTS

The NT (narrower term) reference notes controlled vocabulary terms which are narrower in meaning than the main entry; it is the reciprocal of the BT reference described above. It is used when necessary to clarify the meaning and usage of the main entry. The example above shows that the term FINANCIAL TRANSACTIONS has subcategories of DISBURSEMENTS, INTERFUND TRANSFERS, and RECEIPTS.

Thesaurus: Recommendations for Use

Most users of the Thesaurus will be either indexing survey instruments or retrieving information from the Redundancy Checking System. In the first case, the user will probably start with a phrase from a survey instrument in the second case, with a concept. In both cases, the user will need to answer the question, "How do I express this idea with terms from the Classification Schedules?"

The following guidelines will help the user decide what phrases to look up in the Thesaurus:

1. Use short phrases. Most Thesaurus entries are one to three words long.
2. In general, do not look up phrases connected by _and_ or _or_; look up the components separately. (For example, look up _neglected children_ and _delinquent children_ rather than _neglected and delinquent children_.)
3. Eliminate prepositions wherever possible. (For example, look up _student attitudes_ rather than _attitudes of students_.)
4. Eliminate words dealing with quantity, such as _number of_, _amount of_, _percent of_, and _total_. (For example, look up _enrollment_ rather than _total enrollment_; _school buses_ rather than _number of school buses_.)
5. Look up nouns and noun phrases wherever possible. (For example, look up _student transportation_ rather than _transporting students_.)

When looking up a phrase in the Thesaurus, keep in mind that entries followed by code numbers are controlled vocabulary terms; they may or may not be followed by scope notes and UF, RT, NT, and BT references. Lead-in entries are followed by USE, USE AND, or SEE references. An entry beginning at the bottom of one column may be continued at the top of the next column or on the next page.

If the desired phrase cannot be found in the Thesaurus, the user should consult the Index. To use the Index most effectively, look up the most important noun from the desired phrase. (For example, the phrase health commissions is not found in the Thesaurus; however, looking in the Index under "commissions" will lead to the phrase "commissions, state health.") Then look up in the Thesaurus the phrase found in the Index to determine the appropriate controlled vocabulary term. (To continue the example, the Thesaurus reference for state health commissions is USE STATE GOVERNMENT AGENCIES.) For a more detailed description of the Index, see page 91.

Thesaurus users, especially those unfamiliar with the Classification Schedules are advised to take two more steps after finding what appears to be the appropriate controlled vocabulary term. First, look up the term itself and examine the scope notes, used for, related term, and other references, if any. Second, look up the term in the Classification Schedules and note both its place within the classification structure and the other terms classified near it. These two steps will help ensure that the term originally found is the most appropriate one available and that the user is familiar with the use of that term.

Note that vague or general lead-in entries will reference general controlled vocabulary terms, even though more specific terms may be available. For example, the Thesaurus reference for institutions is USE ORGANIZATIONS, even though the Classification Schedules include many terms describing specific types of organizations. Looking up the referenced term in the Classification Schedules will often reveal specific terms; checking the Index may also be helpful. (For example, the Index includes 21 Thesaurus entries under the heading institutions.)

For detailed discussions of Thesaurus use in indexing and retrieving information on survey instruments, see Redundancy Checking System: Indexing Manual and Redundancy Checking System: Retrieval Manual.

Thesaurus: Recommendations for Update

As education terminology changes and new survey instruments are designed, new phrases will be found that do not occur as lead-ins in the Thesaurus. It is recommended that a list of such phrases be maintained and reviewed at regular intervals.

Once it has been decided that a lead-in should be added to the Thesaurus, the following guidelines will help determine its wording:

1. Keep the lead-in as short as possible.
2. The first 20 characters cannot be identical to those of another lead-in; in other words, it must be unique within the first 20 characters. (For example, if a lead-in operation and maintenance expenditures is already in the Thesaurus, the phrase operation and maintenance staff cannot be added.
3. Avoid prepositions whenever possible.
4. Use nouns and noun phrases.
5. Minimize punctuation. Only hyphens, slashes, and parentheses are permitted.

In deciding what references should appear after the lead-in, first review the descriptions of Thesaurus references on pages 82-84. Next, review the Thesaurus for similar entries; verify that the new one is consistent with them. In deciding where to classify a completely new phrase, it may be helpful to check the Glossary of Education Terminology; the phrase may be classified in the Glossary Structure Display.

When the format for all updates has been determined, prepare and run them as described in section IIB of the Thesaurus/Glossary System: User's Guide. After updating is complete and the change report has been checked, print and distribute new copies of the Thesaurus and Index.

Index

The Index to the Thesaurus lists all controlled vocabulary terms and lead-in entries. The entries are listed alphabetically, not only by the first word but by each significant word (only prepositions and conjunctions are excluded). Thus the phrase library borrowing privileges appears three times, as:

BORROWING PRIVILEGES, LIBRARY
LIBRARY BORROWING PRIVILEGES
PRIVILEGES, LIBRARY BORROWING

The alphabetization is word-by-word; blanks, hyphens, and other special characters are significant. The sequence used in alphabetization (EBCDIC) is:

1 blank spaces;
2 special characters (hyphen, slash, and parentheses);
3 letters;
4 numbers.

Controlled vocabulary terms are not distinguished from lead-in entry terms. For details on how to use the Index, see page 86. The Index cannot be revised directly, but changes made in the Thesaurus will appear in the Index automatically.
